

# FLINT RIVER COUNCIL – CAMP THUNDER PRE-CAMP HEALTH SCREENING

## UNIT INFORMATION:

Date: \_\_\_\_\_ Unit Type/Number: \_\_\_\_\_ Council: \_\_\_\_\_

Leader Name (person who conducted screening): \_\_\_\_\_

## INSTRUCTIONS:

Prior to attending Camp Thunder, we ask that each unit leader review/ask the following questions with all of the attending youth and adults. This needs to be completed directly before departing your home location. Our health officer will review this form upon your arrival at camp.

Ask the following questions, does this apply to anyone in your unit?

Condition	Yes	No
Fever (100°F or greater)		
Sore Throat		
Vomiting		
Diarrhea		
Cough		
Muscle Aches or Lethargy		

## NOTES:

Leaders (to the best of their ability) are asked to verify Health Forms and Histories to ensure all information about medications and needs are accurately listed on the Health Form. Please be prepared to have this form turned in at check-in.

If an individual in your unit has checked yes for fever, vomiting or diarrhea alone OR any combination of two (or more) of the symptoms, DO NOT allow that individual to travel to camp. If there are questions about the individual's health or symptoms, contact their healthcare provider listed on their medical form.

If any individual has been diagnosed by a healthcare provider with a different disease – such as strep – have them follow their healthcare provider's recommendation. Scout camps are adventurous, active and frequently wilderness environments. There is no provision for lodging other than an un-air-conditioned tent. Please help us assure the health and safety of all our campers and staff by assuring and verifying that only Scouts and Scouters who are healthy attend camp.
